

# Automatic

Automatically lock on without adjusting.  
Use the tension screw to increase or decrease the pressure.  
Faster and easier than traditional one.

Automatically locks on without adjusting.

Pressure adjustment screw.

Ergonomic shaped handle.

- ▶ Color options
- Re-engineered release lever
- Controlled release
- No pinch flare

# Automatic Curved Jaw Locking Pliers

The automatic bending jaws automatically lock any size without adjustment. It's faster and easier than traditional locking pliers. Easy to squeeze the release lever, making it easier to release the pliers without damaging your knuckles.

Automatically locks on without adjusting  
Materials Jaw: Chrome Vanadium

Ergonomic shaped handle  
Materials Handle: Carbon Steel  
Finish: Nickel Plated

# Automatic Locking C-Clamps

The jaws automatically lock in any size without adjustment, maintaining the highest tip pressure.

The technology allows you to set the required clamping pressure, from slight to extreme,

the jaws are automatically adjusted to any size with the same clamping pressure.

The clamp-free release lever remains locked until you release it.

Materials Jaw:  
Chrome Vanadium

### With Swivel Pads

Parallel clamping while preventing sunken or planing on delicate surfaces.

Pressure adjustment screw

Ergonomic shaped handle  
Materials Handle: Carbon Steel  
Finish: Nickel Plated

### Color options

Re-engineered release lever  
-Controlled release  
-No pinch flare

# Automatic Welder's Grip Wrench

This automatic fork clamp is made of chrome-molybdenum steel for excellent durability. Its U-shaped jaws provide reliability and work access and maintain good results when the welds are properly aligned.

This locking mechanism allows the jaws to be automatically adjusted to any size for simple one-handed operation.

Whether it is thick or thin.

Suitable for bending, forming and crimping metal sheets. Wide opening jaws provide greater versatility.
